Projects

GramConnect- Rural Governance Platform | *MongoDB, Express.js, React.js, Node.js*

[Link](#)

- Developed a full-stack platform for citizens to apply for certificates, track status, and download approved documents.
- Integrated grievance redressal and government scheme modules, allowing users to apply, track, and access public services easily.
- Integrated role-based admin access (Sarpanch/Gram Sevak) with secure service management, reducing manual workload and improving administrative efficiency

CodeGuardian- AI-Powered Code Reviewer | *React.js, Node.js, Express.js, Google Gemini API*

- Built an AI-based code reviewer using React.js, Node.js, and Express.js, integrated with Google Gemini API to analyze, review, and suggest improvements for user-submitted code.
- Designed a RESTful API that communicates with Gemini to provide intelligent feedback, improving code quality, readability, and adherence to best practices in real-time.
- Enhanced developer productivity by automating the review process, making the platform ideal for educational environments, code learning platforms, and development teams.
